

Feline Sweet: Insulin vs SGLT2 Inhibitors in Managing Diabetic Cats

WEDNESDAY MAY 8, 2024

7-9pm Mountain Time

Hybrid Session at Calgary Humane Society: Ruff House

*Please attend in-person if you can! If we don't get at least 30 in-person registrations we will pivot to Zoom only (and recorded).

Speaker:

Dr. Liz Ruelle, BSc, DVM, Dip. ABVP in Feline Practice

Description:

It's 2024 so forget everything you knew about oral hypoglycemics in cats to regulate their diabetes. With the arrival of two SGLT2 oral hypoglycemics on the market for cats, this CE will discuss traditional insulin therapy and as well as this exciting new drug class; comparing the two so we can make the best care decisions for the most purrfect of species!

Dr. Liz Ruelle

BSc, DVM, Dip. ABVP in Feline Practice

A native Calgarian, Dr. Liz's academic career began with a Bachelor of Science degree from the University of Calgary. Combining her love of travel and determination to be a veterinarian, Dr. Liz studied at the University of Veterinary Medicine in Kosice, Slovakia. She graduated, with great distinction, in 2005 as a Doctor of Veterinary Medicine.

After returning home, Dr. Liz has spent her veterinary career working exclusively with cats (18 years and counting!). In 2009 she became owner of Wild Rose Cat Clinic. In December 2012 Dr. Liz succeeded in her pursuit of board certification by becoming a diplomate of the American Board of Veterinary Practitioners in feline practice. In addition to private practice, Dr. Liz loves to teach and has lectured on topics including cat health, weight management, and communication.

When not focusing on the kitties, she is a busy mom to both her human and fur children (husband Jeff, kids Abby and Greyson; cats Utinni and Zeb) and likes to dabble in home renovation projects.
